Williamson A.M. and The Tennessean | August 2005 - January 2013
- Led efforts to improve SEO throughout the organization through training sessions and tips
- Edited, optimized and curated content for multiple audiences

PROJECTS

QUAVER MUSIC REDESIGN | HTTPS://QUAVERMUSIC.COM/INFO
The complete redesign of QuaverMusic.com into a more modern, responsive site was developed for a better UX for potential Quaver Music customers while also representing the vision of Quaver's founder and president. The redesign was executed with CSS, jQuery, JavaScript, WordPress and more.
QUAVERMUSIC.COM/PREVIEW | HTTPS://QUAVERMUSIC.COM/PREVIEW
This enhanced portal for potential Quaver Music customers was created to gather customer information and provide a better and more responsive experience for those previewing Quaver's curriculum. It was developed with WordPress, CSS, jQuery, PHP, MySQL and more.

BEFORE YOU GO | HTTPS://BEFORE-YOU-GO.FIREBASEAPP.COM/
An app for Pokemon Go users to keep track of their favorites routes for hunting Pokemon. The application utilizes the Google Maps Distance Matrix API, Weather Underground API and the Poke API. The application was created using Angular, Materialize and Firebase.
